DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 13-18 are rejected under 35 U.S.C. 102(b) as being anticipated by France (5,928,306).

As per claims 1, 13, 17 and 18, France discloses:

- the navigation apparatus, having an identifier uniquely associated therewith and provided with a transmitting device for transmitting the identifier to an updating center module (column 8, lines 10-15);
- the updating center module for generating updated navigation information corresponding to the navigation apparatus on the basis of transmitted identifier to output the generated updated navigation information to a delivery base (column 8, lines 16-31); and
- the delivery base for delivering the outputted updated navigation information to the navigation apparatus (figures 1 and 2).

As per claim 2, France discloses the navigation information is recorded on a rewritable recording medium (figure 4 and 6).

As per claims 3, 4 and 5, it is inherent to use a regular computer function like the authenticate a user in order to provide access to the information (column 8).

Art Unit: 3661

As per claim 14, France discloses he generating device changes contents of the updates navigation information so as to corresponds to contents of the acquired identifier, to generate the updates navigation information (column 8, lines 20-33).

As per claim 15, France discloses the generating device associates the acquired identifier with the updated navigation information to generate the updated navigation information (column 8).

As per claim 16, France discloses a location information outputting device for outputting information about a location of the delivery base to the associated navigation apparatus (column 8, lines 33-42 and figure 6).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over by France (5,928,306) in view of Millington et al (6,360,167).

France teaches all the elements claimed by the applicant with the exception of preference information indicative of preferences. However, Millington teaches a “delivery base” (programming base 50), writing or enabling updated navigation information that includes points of interest, destinations and guided multimedia tours to be added to the removable media 46 of the navigation system. With respect to claim 6, this reads on “preference information indicative

Art Unit: 3661

of preferences". Therefore, it would have been obvious to one of ordinary skill in the art to combine the aforementioned references in order to enhance the system.
